

National Girls Collaborative Project

Advancing the Agenda in Gender Equity

For Science, Technology, Engineering and Mathematics

The NGCP is funded by a grant from the National Science Foundation and AAUW is a partner with this project. You can obtain more information and register through the website of the National Girls Collaborative Project:

www.ngcproject.org/northwest/events.html.

I also invite you to take a look at the program directory on the NGCP website. If you are involved in any project or program in which you collaborate with another organization to encourage girls to pursue science, technology, engineering or math, then please take advantage of the opportunity to list your project or program in this free directory. Instructions for entering a new listing are found at:

www.ngcproject.org/directory/newuser.cfm.

Registering on the website enables you to receive the NGCP on-line newsletter, notices of future special events, and information about the availability of \$1000 mini-grants for collaborative projects. Our local AAUW branch is interesting in learning more about STEM programs and resources available in our community. I would be interested in talking with you about how we might collaborate at the local level to help implement the AAUW Mission, which is *Advancing Equity for Women and Girls through Advocacy, Education and Research*. If you would like more information about AAUW, please visit our national website: www.aauw.org.

I look forward to hearing from you. Carolyn Hayek, AAUW Regional Liaison
